Education

Modern Education Society's Wadia College of Engineering, Pune

2023 – 2027

Bachelor of Engineering in Computer Engineering

CGPA: 9.48/10 (through 6th semester)

Modern Education Society's Nowrosjee Wadia College, Pune

2021 – 2023

HSC (12th) — **College Topper** — Maharashtra State Board

Percentage: 91.67%

Stella Maris School, Pune

2021

SSC (10th) Maharashtra State Board

Percentage: 92.80%

Technical Skills

AI/ML : NLP, Transformers, BERT, Named Entity Recognition, Scikit-Learn, Logistic Regression

Generative AI : OpenAI API, LLMs, RAG Fundamentals, Prompt Engineering

Languages : Python, Java, JavaScript, SQL

Backend & APIs : Node.js, Express.js, REST APIs, JWT Authentication, Hugging Face

Frontend : React.js, HTML, CSS

Databases & Tools : PostgreSQL, MongoDB, MySQL, Docker, Git, GitHub, Postman

Relevant Coursework

- Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Machine Learning

Experience

Full Stack Intern

September 2025 – April 2026

AlgoAnalytics Pvt. Ltd. — Pune, India

- Built Node.js/Python backend services and REST APIs, cutting data-processing latency by 15% using asynchronous execution.
- Created high-coverage Jest test suites achieving 90%+ line/statement coverage for backend reliability.
- Developed responsive React.js dashboards to consume internal media-management API contracts.

Projects

PII-Shield 🛡️ | Node.js, Hugging Face Transformers.js, BERT, Regex, MERN

April 2026 – June 2026

- Engineered a hybrid PII pipeline using **bert-base-NER** and regex rules, achieving sub-200ms latency across 5+ sensitive entity categories.
- Built a token-mapping mechanism for reversible data re-hydration while keeping PII processing local with zero external API dependency.

Gaming Monitor Extension 🛡️ | Scikit-Learn, Chrome Extension, Logistic Regression

January 2025 – April 2025

- Trained a 3-class Logistic Regression model using a 3-feature telemetry vector (*duration, frequency, average session*) to classify aggression levels.
- Implemented a lightweight JavaScript Softmax inference engine using extracted 3x3 model weight matrices, enabling real-time classification from telemetry data.

HealthHabit 🛡️ | OpenAI API, Node.js, PostgreSQL, React.js, REST APIs

May 2025 – June 2025

- Integrated OpenAI API LLMs with structured prompt workflows to process user activity trends and generate personalized habit recommendations.
- Engineered 10+ RESTful APIs with JWT authentication and PostgreSQL to manage user progress data used for personalized AI recommendations.

Achievements

- Secured **Rank 667** in the **ICPC AlgoQueen Girls Programming Cup 2026**.
- Secured **8th Rank** nationally with **Team VentureSphere** in IIT Bombay's National Entrepreneurship Challenge.
- Selected for GirlScript Summer of Code (GSSoC) 2025 and contributed to multiple open-source projects.

Certifications

- Mastering Generative AI and ChatGPT - GeeksforGeeks
- Full Stack Web Development - Udemy
